

County Health Rankings and Roadmaps

Link: <https://www.countyhealthrankings.org/explore-health-rankings>

The County Health Ranking and Roadmaps is a program of the University of Wisconsin Population Health Institute. It allows users to explore the individual and community factors that influence citizens' quality and length of life within a state, a county, or a zip code.

Indicators and Types of Data			
Health Behaviors	Clinical Care	Social and Economic Factors	Physical Environment
<ul style="list-style-type: none"> • Tobacco use -adult smoking • Diet & exercise -adult obesity -food environment index -physical inactivity -access to exercise opportunities -food insecurity -access to healthy foods • Alcohol & drug use -excessive drinking -alcohol-impaired driving -drug overdose deaths • Sexual activity -sexually transmitted infections -teen births 	<ul style="list-style-type: none"> • Access to care -primary care physicians -dentists -mental health providers -uninsured adults -uninsured children -other primary care providers • Quality of care -preventable hospital stays -mammography screening -flu vaccinations 	<ul style="list-style-type: none"> • Education -HS education -some college -HS graduation -disconnected youth -reading scores -math scores -school segregation -school funding adequacy • Employment -unemployment • Income -children in poverty -income inequality -gender pay gap -living wage -children eligible for free or reduced lunch • Family & social support -children in single-parent households -social associations -residential segregation -child care cost burden -child care centers • Community safety -injury deaths -homicides -suicides -firearm fatalities -motor vehicle crash deaths -juvenile arrests 	<ul style="list-style-type: none"> • Air & water quality -air pollution -drinking water violations • Housing & transit -severe housing problems -driving alone to work -long commute – driving alone -traffic volume -homeownership -severe housing cost burden -broadband access
